

## NEi Token (Simulation Analysis)

### Overview

NEi Tokens provides the expansion of NEi Software's total simulation software package within a flexible licensing system, allowing you to use a variety of simulation tools with no restriction on time or usage. The NEi Tokens based system provides an efficient way of obtaining simulation tools from a single source with out having to support a seat of software. NEi Tokens offers a way to maximize your productivity without minimizing your budget.

### The NEi Token System

The NEi Token systems allow you access to a pool of tokens. Your tokens are checked out from the pool and can be used to access and run a full range of simulation solutions. All available under the NEi Token system from NEi Software. Each individual software item requires a certain number of tokens to run. After each use, your tokens are checked back in for reuse. There are over 25 different software products available under the NEi Token System.

The exchange of paying for a seat of software is greatly exceeded for what you get in using tokens. The pool of tokens purchased generates more flexibility towards the variety of application one uses as well as gaining multiple usages off of one system. This as well lends to obtaining access to various applications for a single price.

NEi Software is not only recognized as a leader in customer driven enhancements and execution of quality development but also understands their customer's budgetary needs. This also ranscends in supporting customers through NEi Tokens.

### Benefits

- Enhance your speed to market by taking advantage of the full breadth of the NEi Token system
- Create better teamwork amongst your organization through flexibility of shared products, manageability of time and efficiency through more software
- Significant savings over the cost of individual licenses needed to satisfy the same number of users
- Secure your goals through accurate analysis simulation from NEi Software
- Easy Administration

### Who can benefit from NEi Tokens

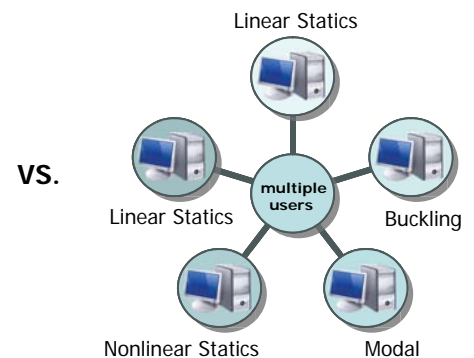

- VP of Engineering
- Engineering Managers
- Engineering Departments
- Analysts

#### Classic License

1 user

#### Token License

### Some of the Products Included

- Linear and Nonlinear Statics
- Normal Modes
- Prestress and Buckling
- Basic and Advanced Dynamics
- Linear and Nonlinear Transient Heat Transfer
- Editor
- NEiWorks
- NEiFusion
- OP2 and XDB Translators
